## CribMaster Inventory Management System

CribMaster is an all-inclusive inventory control system that improves manufacturers' ability to distribute and track tools and other supplies with accuracy and confidence. The Windows-based software, developed specifically for the manufacturing industry, uses bar coding to tie fast and reliable toolcrib transactions to a powerful system of inventory control.

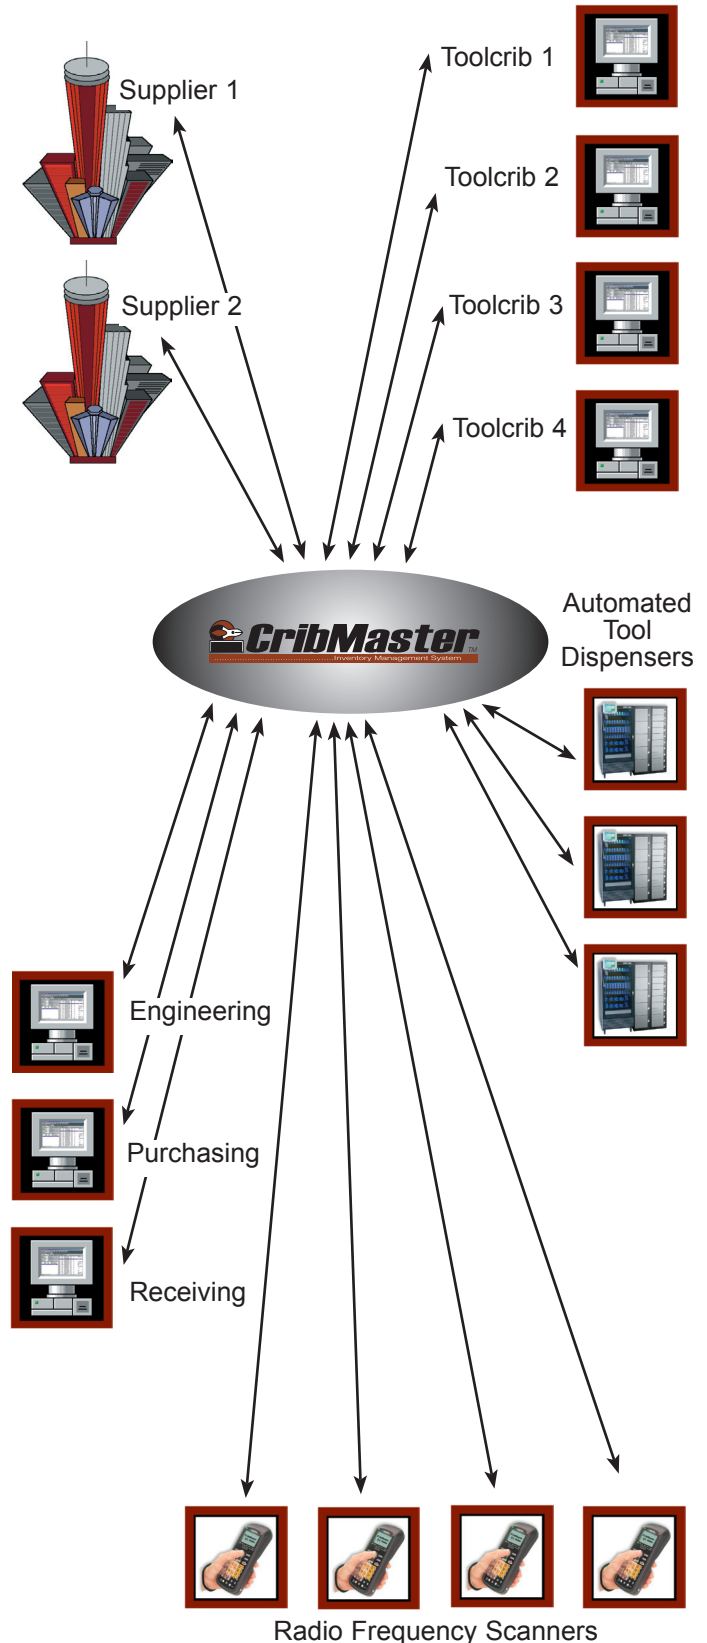

CribMaster's flexibility means it fits the needs of manufacturers of any size, whether using an attended toolcrib, automated storage and retrieval, or a combination of both. The CribMaster system monitors tool inventory and usage, tracks consumption and budget, issues purchase orders either automatically or manually, and includes more than 170 standard reports. The Preventive Maintenance Module adds a work order system that automates scheduling and tracking of maintenance and repairs to assets.

### CribMaster Features Overview:

- ▷ Windows NT/2000/XP/7
- ▷ Access/SQL Server/Oracle Databases
- ▷ Crystal Reports
- ▷ Multiple Users
- ▷ Bar Code Enabled
- ▷ Scalable/Configurable
- ▷ Radio Frequency/Batch Bar Code Scanners
- ▷ Multiple Cribs
- ▷ Expendable, Durable, Reworkable, Kits/Assemblies
- ▷ Serialized Items with Complete Traceability
- ▷ Document Management for Drawings, Blueprints, etc.
- ▷ Instant Item Lookup
- ▷ User Definable Cost Centers
- ▷ Preventive Maintenance Suite
- ▷ Gauge Calibrations and Tracking
- ▷ User Definable Fields
- ▷ Automatic Replenishment
- ▷ Multiple Cost Breaks
- ▷ Economic Ordering Calculations Based on History
- ▷ Fax, EDI and E-Mail Purchase Orders
- ▷ 170+ Reports and Automatic Print Report Scheduling
- ▷ Bar Code Labels
- ▷ Configurable Security Levels
- ▷ Dial-in Supplier Access
- ▷ Secure Point-of-Use Distribution
- ▷ Consigned Inventory - Integrated Supply

### The CribMaster System includes:

- ▷ Inventory Control
- ▷ Complete Purchasing
- ▷ CribMaster Reports
- ▷ Preventive Maintenance
- ▷ CribMaster Toolboxes
- ▷ CribMaster Lockers
- ▷ CribMaster Scanners
- ▷ CribMaster ToolCube and much more...

## ToolClarity

ToolClarity is Europe's leading supplier of RFID Tool Control and Inventory Management Systems.

We specialise in Radio Frequency Identification and are very proud to have been chosen as international distributors for the award winning range of CribMaster Software, Point of Use Vending devices, and RFID portals.

We also offer European based maintenance and support packages which include preventative maintenance and ongoing data analysis to guarantee that you continue to get the most from your systems and ensure you always have access to the best technical support & advice when you need it.

We look to partner with our customers to deliver continuous improvements in indirect material management and deliver tangible savings to your bottom line through reduced inventory, consumption, resourcing, and increased productivity.

Our business strives to provide an unparalleled customer experience, combining our in-depth knowledge of the technology with a practical understanding of the needs of our customers. Our team are passionate about what we do. We have many years of experience working with the hardware and software we offer, and have implemented systems for some of the worlds leading Aerospace, Automotive, and MRO companies.

**Contact us today to discuss how our systems can help you reduce your Indirect Materials consumption, track tooling, and eliminate Foreign Object Debris.**
